by some other means. The request is being repeated for the last 10 or 12 years. Unless some such effective steps are adopted, it is certain that the entire hobli will become depopulated in a short time.

SUBJECT No. 718.

Location of the Yedatore taluk office at Saligrama.

Mr. Boregowda, Yedatore taluk.

Summary of Representation.—Yedatore town being very unhealthy, most of the officials of this taluk office fall ill and Government work suffers. The taluk may therefore be shifted to Saligrama which, besides being a very large town in the taluk, is quite healthy and was once the seat of a taluk cutcherry.

SUBJECT No. 719.

Removal of prickly-pears in the Chamrajnagar taluk.

Mr. Doraśami Iyengar, Chamrajnagar taluk.

Summary of Representation.—Prickly-pear has grown all along the side of the roads thereby causing great inconvenience to passengers as well as to traffic. The removal of these may be enforced upon the land-holders concerned and in the case of Government lands it may be attended to by the Government.

SUBJECT No. 720.

Narasambudhi tank in the Nanjangud taluk.

Mr. Chandrasekharaiya, Nanjangud taluk.

Summary of Representation.—Narasambudhi tank is silting up every year and its capacity is decreasing and the water stored therein is not sufficient for the lands thereunder. It is therefore prayed that orders may be passed for increasing the capacity of the tank.

SUBJECT No. 721.

A dam across the Kapila river near Bidrahalli.

Messrs. M. Subba Rao, and Syed Rahim Sab, Heggaddevankote taluk.

Summary of Representation.—There is no dam across the river Kapila between Bavani and Hullahalli a distance of about 50 miles. Near Bidrahalli there was a dam formerly. It is prayed that a dam may be constructed there by which many lands will be converted into wet to the advantage of both the Government and raiyats.

SUBJECT No. 722.

Restoration of Nalur tank.

Mr. Chikkamallappa, Gundlupet taluk.

Summary of Representation.—Nalur tank is a very large reservoir, the sluice and revetment stones of which are still in existence. The *kodi* water of some 10 serial tanks situated higher up and the drainage of the valley of Siddu Roy find their way into the Kapila river through this tank. The tank bed which is nearly 500 acres in extent is in disrepair. On account of a breach in the middle of the bund, no water could be stored in the tank. If this tank is restored, nearly 20 or 25 thousands of acres of land can be converted into wet besides feeding the Kalale tank and Halahalli *Ané*.

The project was investigated about 15 years ago by an Engineer and till now no final orders have been passed.

SUBJECT No. 723.

An anicut across the Lokapavani river in the Nagamangala taluk.

A dam across the Lokapavani river near Gangavadi.

Messrs. Linganniah and Parameswariah, Mandya taluk.

Summary of Representation.—The supply of water to the Basaralu, Muttegere and Bandenahalli tanks is not regular every year and crops under the tank suffer. It is prayed that sanction of Government may be accorded at least this year for building an anicut across the Lokapavani river near Gangavadi to feed the above tanks as the
